

LP® SmartSide® ExpertFinish® Trim & Siding Featured as Sustainable Siding Product for Net-Zero Electricity Home at the 2022 Berkshire Hathaway Shareholders Meeting

May 17, 2022

Prefinished home siding product selected for Clayton's first net-zero electricity home

NASHVILLE, Tenn., May 17, 2022 /PRNewswire/ -- [LP Building Solutions](#) (LP), a leading manufacturer of high-performance building products, was selected as the trim and siding partner of choice for the first net-zero electricity home built by [Clayton](#), a national builder of off-site and site-built homes. Clayton, a Berkshire Hathaway company, unveiled the home which featured LP® SmartSide® ExpertFinish® Trim and Siding in Abyss Black at the 2022 Berkshire Hathaway Shareholders meeting in Omaha, Nebraska.

Clayton selected [LP® SmartSide® ExpertFinish® Trim & Siding](#), a prefinished siding option introduced in 2020, for its first net-zero electricity home due to its sustainably, ethically harvested wood fiber, and low-carbon attributes.

"LP is excited to partner with companies like Clayton that are dedicated to both environmental sustainability and delivering a high-performance product," said LP Executive Vice President, General Manager of Siding Jason Ringblom. "One of our core values at LP is doing the right thing today to ensure a brighter future for the next generation, and we are committed to building relationships with companies who value the same."

Manufacturing responsibly sourced, high-performing, and long-lasting engineered wood building products is fundamental to LP's sustainability commitment. LP products store carbon for generations, making them the number-one choice for sustainable, energy-efficient building materials. In fact, LP® SmartSide® Trim & Siding stores more carbon than it releases into the atmosphere from production to end-of-life, making it a carbon-negative exterior cladding product.

LP SmartSide ExpertFinish Trim & Siding is engineered to perform and designed to complement almost any architectural style. With 16 versatile colors to choose from, ExpertFinish maintains the beauty of traditional wood while featuring the durability, workability, and easier maintenance that comes with SmartSide engineered wood products. In addition, ExpertFinish can be installed 36% faster than prefinished fiber cement siding, allowing builders and remodelers to finish three jobs in the time it takes to finish two with fiber cement.
